

**Department of Applied Chemistry**  
**2022/2023. I. semester**

**Dr. Kuki Ákos**

(Chemical Engineering BSc)

**Application of free chemical engineering software**

Free calculators, process simulators allow chemical engineering students and chemical engineers to better understand the behavior of their chemical systems by using rigorous thermodynamic and unit operations' models with no cost at all.

**Dr Nagy Lajos**

(Chemical Engineering BSc)

**Fragmentation of biologically active small organic molecules under soft ionization conditions**

(Chemical Engineering BSc)

**Kinetic study of different industrially important isocyanates in the presence of alcohols or polyols**
